EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lisa Schoedel on 11/13/03.

1. The application has been amended as follows: Claims 23-52 are cancelled.

The following is an examiner's statement of reasons for allowance:

2. The prior art teaches an acceleration sensor with a structure of a transistor with a source, drain, channel, gate, and gate insulator wherein the gate insulator is made out of silicon dioxide and the gate is suspended by a spring attached to the silicon dioxide layer above the channel with a mass attached thereon the gate. The prior art does not teach the above structure in combination with the gate and spring being attached to silicon dioxide posts wherein a major portion of the source, drain, channel, and gate are between the posts. This combination has been found non-obvious, thus novel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
